DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Claims 1, 3-6, 8, 9 and 11 are allowed.

Regarding claim 1, the references Clifford, Marcie and Saylor fail to teach converting the PCM modulated first digital audio samples to an analog audio waveform that is the acoustic equivalent of the PCM modulated first digital audio samples, converting the analog audio waveform to PCM modulated second digital audio samples, comparing the PCM modulated first digital audio samples against the PCM modulated second digital audio samples and determining the distance between the portable wireless communication device and the RF equipped Point-of-sale device based on the known speed of propagation of radio waves, the known speed of sound, and the time difference between the arrival of the PCM modulated first digital audio samples and the acoustic signal.

Regarding claims 6 and 9, the references Clifford, Marcie and Saylor fail to teach receiving the digitized version of the multi-tone acoustic signal in the form of PCM modulated first digital audio samples via an RF link, converting the received multi-tone acoustic signal to PCM modulated second digital audio samples, comparing the PCM modulated first digital audio samples against the PCM modulated second digital audio samples and determining the distance between the RF equipped Point-of-sale device and the portable wireless communication device based on the known speed of propagation of radio waves, the known speed of sound, and the time difference between the arrival of the PCM modulated first digital audio samples and the multi-tone acoustic signal.
